Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

A complete list of International Trade Division's publications is shown on the (inside) back cover of this publication.

Inquiries about this publication and related statistics or services should be directed to:

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarlingue et le système d'extraction de Statistique Canada.

Notice to Subscribers

Effective with the 1988 edition of this publication, commodity statistics are based on the "Harmonized Commodity Description and Coding System" (Harmonized System or H.S.). Users should therefore interpret the commodity data cautiously.

Information concerning the "Harmonized System" is available in the manuals titled the "Customs Tariff" catalogue RV55-2/1988E (Canadian Government Publishing Centre, Ottawa, Canada K1A 0S9) and "The Canadian Export-Import Alphabetical Index" catalogue 12-579E (Statistics Canada) or by contacting the International Trade Division, Statistics Canada K1A 0T6.

In addition to the above-mentioned change, users should note that the country classification has been expanded to resemble the classification developed by the International Organization for Standardization (ISO) which has been adopted by most of the trading countries for Customs purposes. A list of the major changes to Merchandise Trade Data is shown on page iv of this publication.

Avis aux abonnés

À compter du numéro de 1988, les statistiques sont classées selon le "Système harmonisé de désignation et de codification des marchandises" (Système harmonisé, ou S.H.). Les utilisateurs devraient faire preuve de prudence dans l'interprétation des données par marchandises.

On peut obtenir des renseignements sur le "Système harmonisé" dans les ouvrages intitulés "Tarif des douanes" no RV55-2/1988F au catalogue (Centre d'édition du gouvernement du Canada, Ottawa, Canada K1A 0S9) et "Liste alphabétique des exportations-importations canadiennes", no 12-579F au catalogue (Statistique Canada) ou en communiquant avec la Division du commerce international, Statistique Canada K1A 0T6.

Outre les changements mentionnés ci-dessus, il est à noter que le classement par pays a été élargi pour ressembler à celui de l'Organisation internationale de standardisation (OIS) qui a été adopté dans la plupart des pays du monde à des fins douanières. Une liste des principaux changements aux données sur le commerce des marchandises est montrée à la page iv de cette publication.

NOTE TO USERS

Because of the introduction of the H.S. and of revised concepts and definitions, the International trade data may be subject to larger revision than usual:

- the collection and compilation of merchandise imports and exports are based on the HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM (HS). Users should therefore interpret the commodity data cautiously;
- imports on a CUSTOMS BASIS are compiled by country of origin instead of country of consignment/export;
- the recording of imports is now based on the date the merchandise is released by Customs instead of the Customs-stamp date;

NOTE AUX UTILISATEURS

Suite à l'introduction du S.H. et aux changements apportés aux concepts et aux définitions, les données sur le commerce international peuvent présenter des révisions plus importantes que d'habitude:

- la collecte et la compilation des importations et des exportations sont désormais basées d'après le SYSTÈME HARMONISÉ DE DÉSIGNATION ET DE CODIFICATION DES MARCHANDISES (SH). Les utilisateurs devraient faire preuve de prudence dans l'interprétation des données par marchandise;
- les importations sur BASE DOUANIÈRE sont présentées par pays d'origine plutôt que par pays de consignment/exportation;
- l'enregistrement des importations s'établit dorénavant d'après la date de main levée des marchandises par les Douanes et non plus d'après la date d'estampille sur le document;

The Canadian International Merchandise Trade Statistical Program

I Introduction

The objective is to provide a general overview of the Canadian International Merchandise Trade Statistical Program with special reference to the concepts and definitions. The text is intended for the general user and readability is emphasized. More technical details can be obtained from the International Trade Division upon request.

II Conceptual Framework

1. **Objectives and Coverage:** The primary objective of the Canadian International Merchandise Trade Statistical Program is to measure the change in the stock of material resources of the country resulting from the movement of merchandise into or out of Canada. Information on imports and exports are inputs into the System of National Accounts, particularly in the Balance of Payments and Gross Domestic Product and are used in the formulation of trade and budgetary policies. Governments, importers, exporters, manufacturers and shipping companies use trade statistics to:

- monitor import penetration and export performance
- monitor commodity price and volume changes
- examine transport implications.

2. **Trade Statistics – Customs Basis/Balance of Payments Basis:** Merchandise trade statistics are reported and presented on two different basis: Customs basis and Balance of Payments basis (B.O.P.).

Canada's international merchandise trade statistics are derived almost exclusively from administrative records of Revenue Canada, Customs and Excise. When goods are imported into or exported from Canada, declarations must be filed with Customs giving such information as description and value of the goods, origin and port of clearance of commodities and the mode of transport. Most of this information is required for the purposes of Customs administration. Statistics developed from administrative records of Customs are commonly referred to as Customs based trade statistics.

Customs based information is adjusted to conform with the National Accounts concepts and definitions. The adjustments to derive Balance of Payments based trade data include trade definition, valuation and timing related adjustments. The principal difference between the two trade concepts is that Customs based merchandise trade

Le programme de statistiques sur le commerce international de marchandises du Canada

I Introduction

Le présent document contient un aperçu général du Programme de statistiques sur le commerce international de marchandises du Canada, notamment des concepts et des définitions. Il est destiné au grand public, aussi a-t-on essayé d'en faciliter la lecture. Pour plus de précisions techniques, s'adresser à la Division du commerce international.

II Cadre conceptuel

1. **Objectifs et champ d'observation:** Le but principal du Programme de statistiques sur le commerce international de marchandises du Canada est de mesurer les fluctuations du stock de ressources matérielles du pays qu'entraîne le mouvement des marchandises au Canada. Les renseignements sur les importations et les exportations sont introduits dans le Système de comptabilité nationale, notamment en ce qui concerne la balance des paiements et le produit intérieur brut, et servent à formuler les politiques commerciales et budgétaires. Les administrations publiques, les importateurs, les exportateurs, les fabricants et les expéditeurs utilisent les statistiques commerciales pour:

- vérifier la pénétration du marché par les importations et la performance des exportations
- suivre les changements qui interviennent au niveau des prix et du volume des marchandises
- examiner les répercussions en matière de transports.

2. **Statistiques sur le commerce établies sur une base douanière et en fonction de la balance des paiements:** Les statistiques sur le commerce des marchandises sont établies et présentées sur deux bases différentes: la base douanière et la balance des paiements (B.D.P.).

Les statistiques sur le commerce international des marchandises du Canada sont tirées presque entièrement des dossiers administratifs de Revenu Canada, Douanes et Accise. Lorsque des marchandises sont importées au Canada ou en sont exportées, elles doivent être déclarées aux douanes et l'importateur ou l'exportateur doit donner des renseignements sur la désignation et la valeur des marchandises, leur origine et le bureau de dédouanement ainsi que sur le mode de transport. La plupart de ces renseignements sont requis par l'administration des douanes. On appelle généralement "statistiques commerciales établies sur la base douanière" les statistiques commerciales élaborées à partir des dossiers administratifs des douanes.

Les données établies sur la base douanière sont rectifiées pour qu'elles puissent concorder avec les concepts et les définitions de la comptabilité nationale. Les modifications apportées pour établir des données commerciales en fonction de la balance des paiements, portent sur la définition de commerce, l'évaluation et la période statistique. La différence principale entre ces deux concepts

statistics cover the physical movement of goods as they are reflected on Customs documents, whereas Balance of Payments adjusted data are intended to cover all economic transactions between residents and non residents, which involve merchandise trade. This section describes the concepts and processes pertaining to the Customs based trade statistics only.

3. **System of Trade:** Canadian trade statistics are compiled according to the "General" system of trade as defined by the United Nations Statistical Office. Under this system, imports include all goods which have crossed Canada's territorial boundary, whether for immediate consumption in Canada or stored in bonded Customs warehouses. Domestic exports include goods grown, extracted or manufactured in Canada, including goods of foreign origin which have been materially transformed in Canada. Re-exports are exports of goods of foreign origin which have not been materially transformed in Canada, including foreign goods withdrawn for export from bonded Customs warehouses. Total exports are the sum of Domestic exports and Re-exports. Thus the general trade system, in principle, presents all goods entering the country (imports) and all goods leaving the country (exports). It differs from the "Special" system of trade in the treatment of imported goods into Customs bonded warehouses. Under the "Special" system, these goods are counted only if and when they are withdrawn from customs warehouses for home consumption, and they are not counted in export statistics unless they have first cleared Customs.

Conceptually, under the "General" system, the statistical frontier coincides with the geographical boundary, while under the "Special" system, it coincides with the Customs boundary.

4. **Valuation:** For Customs purposes, imports are recorded at values established according to the provisions of the Customs Act, which, since January 1, 1985, reflects valuation methods based on the General Agreement on Tariffs and Trade (GATT) Valuation Code System. It generally requires the value for duty of imported goods be equivalent to the transaction value or the price actually paid or payable provided that a number of conditions are met. One of the important conditions is that the buyer and seller must be independent of each other. If the conditions are not met, practical rules are used to determine the Customs value. In order of precedence these are:

- valuation by reference to the transaction value of identical goods;
- valuation by reference to the transaction value of similar goods;
- the deductive method of valuation;
- the computed method of valuation; and
- the residual method of valuation.

To determine the transaction value of imported goods all transportation and associated costs arising in respect of the goods being appraised prior to and at the place of direct shipment to Canada are to be added to the price of the goods. Therefore, Canadian imports are valued F.O.B.

commerciaux est que les statistiques sur le commerce de marchandises établies sur une base douanière couvrent le mouvement des marchandises indiqué sur les documents douaniers, alors que les données établies en fonction de la balance des paiements portent sur toutes les transactions économiques effectuées entre résidents et non-résidents du Canada et concernant le commerce de marchandises. Le présent chapitre traite des concepts et des procédés relatifs aux statistiques établies sur la base douanière.

3. **Système commercial:** Les statistiques sur le commerce du Canada sont rassemblées selon le système commercial "général" défini par le Bureau de statistiques des Nations Unies, en vertu duquel les importations portent sur toutes les marchandises qui ont franchi les frontières du Canada, que ce soit pour y être consommées immédiatement ou pour être mises dans un entrepôt de douane. Les exportations nationales comprennent les produits cultivés, extraits ou fabriqués au Canada (y compris les produits d'origine étrangère qui ont été transformés au Canada). Les réexportations sont les exportations de produits d'origine étrangère qui n'ont pas été transformés au Canada (y compris les produits étrangers sortis des entrepôts de douane aux fins d'exportation). Le total des exportations correspond à la somme des exportations nationales et des réexportations. Le système commercial général couvre donc, en principe, toutes les marchandises qui entrent au pays (importations) et toutes celles qui en sortent (exportations). Il diffère du système commercial "spécial" par le traitement des marchandises importées qui sont entreposées en douane. Dans le cas du système "spécial", il n'est tenu compte de ces produits que lorsque ceux-ci sont sortis d'entrepôt de douane aux fins de consommation nationale et il n'en est pas tenu compte dans les statistiques d'exportation s'ils n'ont pas tout d'abord été dédouanés.

En théorie, dans le cadre du système "général", la frontière statistique coïncide avec les limites géographiques du pays, alors que dans le cadre du système "spécial", elle coïncide avec la frontière douanière.

4. **Évaluation:** Aux fins des douanes, les importations sont présentées selon les valeurs établies conformément aux dispositions de la Loi sur les douanes qui, depuis le 1^{er} janvier 1985, prévoit l'application de méthodes d'évaluation fondées sur le Code d'évaluation de l'Accord général sur les tarifs douaniers et le commerce (GATT). En général, la valeur imposable des marchandises importées doit correspondre à la valeur transactionnelle ou au prix réellement payé ou payable, sous certaines conditions. L'une des plus importantes de ces conditions est que l'acheteur et le vendeur doivent être indépendants l'un de l'autre. Si ces conditions ne sont pas remplies la valeur en douane est déterminée selon certaines règles pratiques, mentionnées ci-dessous par ordre de priorité:

- l'évaluation en fonction de la valeur transactionnelle de produits identiques;
- l'évaluation en fonction de la valeur transactionnelle de produits similaires;
- la méthode de la valeur de référence;
- la méthode de la valeur reconstituée; enfin,
- la méthode de la dernière base d'appréciation.

Pour déterminer la valeur transactionnelle des produits importés, il faut ajouter au prix de ces produits tous les frais de transport et tous les frais connexes engagés à l'égard des marchandises avant l'expédition directe au Canada jusqu'au lieu d'expédition directe. En conséquence, le prix des importations canadiennes est le prix

place of direct shipment to Canada. It excludes freight and insurance costs in bringing the goods to Canada from the point of direct shipment.

Exports are, in principle, valued or recorded at the values declared on export documents which usually reflect the transaction value, i.e. actual selling price, or in case of non-arm's length transaction, the transfer price used for company accounting purposes. Most Canadian exports to overseas countries are valued at F.O.B. port of exit including domestic freight charges to that point but net of discounts and allowances. Canadian exports to the U.S.A. are valued F.O.B. place of lading net of freight charges, discounts and allowances.

5. **Commodity Classification:** Both export and import statistics are classified and published according to the Harmonized Commodity Description and Coding System (Harmonized System or H.S.).

The Harmonized System used in this publication is an international commodity classification (six-digit) developed under the auspices of the Customs Cooperation Council. It was extended to ten digits for imports to serve as the basis for Customs tariffs and international trade statistics. For export purposes the international six digit "root" was extended to eight digits. Canada adopted this system to replace the "Customs Tariff Schedule", as well as the "Canadian International Trade Classification" (CITC) and the "Export Commodity Classification" (XCC).

The Harmonized System is based on a fundamental principle – that goods are classified by what they are and not according to their stage of fabrication, use, made in Canada status or any other such criteria.

The Harmonized System nomenclature is logically structured by economic activity or component material. For example, animals and animal products are found in one section; machinery and mechanical appliances which are grouped by function are found in another.

The nomenclature is divided into 21 Sections, which in general, group goods produced in the same sector of the economy. For example: Section IV, "Prepared Foodstuffs; Beverages, Spirits and Vinegar; Tobacco and Manufactured Tobacco Substitutes" (i.e. agricultural products) and Section VI "Products of the Chemical or Allied Industries" etc. (i.e. chemical products, etc.).

Each Section is comprised of one or more Chapters with the entire nomenclature being composed of 97 Chapters (Chapter 77 is reserved for possible future use). The Chapters of Sections I to XV (except Section XII) are grouped by **Biological Genus** (Section I, Chapters 1 – 5 Live Animals, Animal products, Fish, Dairy Produce etc.) or by the **Component Material** from which articles are wholly or mainly made (e.g. Section VIII contains Chapter 41 – Raw Hides and Skins; Chapters 42 Articles of Leather, etc.).

F.A.B., lieu d'expédition directe au Canada. Les coûts du fret et de l'assurance nécessaires pour acheminer les marchandises au Canada depuis le point d'expédition direct ne sont pas compris.

Les exportations sont, en principe, évaluées ou enregistrées selon la valeur déclarée dans les documents d'exportation; il s'agit habituellement de la valeur transactionnelle, c.-à-d. du prix de vente réel ou, dans le cas des opérations d'entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. Les prix de la plupart des exportations canadiennes vers des pays d'outre-mer sont des prix F.A.B., port de sortie, fret intérieur compris jusqu'à ce point, mais sans les escomptes ni les rabais. Les prix des exportations canadiennes aux États-Unis sont des prix F.A.B. lieu de chargement, fret, escomptes et rabais non compris.

5. **Classification des marchandises:** Les statistiques sur les exportations et les importations sont classées et publiées d'après le Système harmonisé de désignation et de codification des marchandises (Système harmonisé ou SH).

Le Système harmonisé utilisé dans la présente publication s'inspire de la classification internationale de marchandises (code numérique à six chiffres) mise au point sous les auspices du Conseil de coopération douanière. Le nombre des chiffres a été porté à dix pour les importations afin que cette classification puisse servir de base aux tarifs douaniers et aux statistiques internationales. Pour ce qui est des exportations, la "racine" internationale de six chiffres a été portée à huit chiffres. Le Canada a adopté ce système pour remplacer les listes du Tarif des douanes, de même que la Nomenclature canadienne pour le commerce international des marchandises (NCCI) et la Classification des marchandises d'exportation (CME).

Le Système harmonisé repose sur le principe fondamental selon lequel les produits sont classés d'après leur nature et non d'après l'étape de leur fabrication, leur utilisation, leur qualité de produits faits au Canada, ou tout autre critère analogue.

La nomenclature du Système harmonisé est logiquement structurée selon l'activité économique ou la matière composante. Ainsi, les animaux et les produits d'origine animale se trouvent dans une section; les machines et les appareils mécaniques, qui sont groupés par fonction, se trouvent dans une autre.

La nomenclature est divisée en 21 sections qui regroupent, en général, les marchandises produites dans le même secteur de l'économie. Par exemple: la section IV, "Produits des industries alimentaires; boissons, liquides alcooliques et vinaigre; tabac et succédanés du tabac fabriqués" (c.-à-d. les produits agricoles) et la section VI, "Produits des industries chimiques ou des industries connexes", etc. (c.-à-d. les produits chimiques, etc.).

Chaque section comprend un ou plusieurs chapitres, et l'ensemble de la nomenclature compte 97 chapitres (le chapitre 77 étant réservé pour une utilisation future). Les chapitres des sections I à XV (sauf ceux de la section XII) sont regroupés selon le **règne biologique** (section I, chapitres 1 à 5, Animaux vivants, viandes et abats comestibles, poissons, produits de laiterie, etc.) ou selon la matière composante à partir de laquelle l'ensemble ou une grande partie des articles sont fabriqués (p. ex.: la section VIII renferme le chapitre 41 – Peaux et cuirs, et le chapitre 42 Ouvrages en cuir, etc.).

In Sections I to XV (except Section XII) the groups of products formed according to their basic material are structured or divided in two ways:

Horizontal – For the groups of products formed according to their basic material there is no apparent hierarchical order (e.g. Chapter 39 – "Plastics and Articles Thereof"; Chapter 44 – "Wood and Articles of Wood"); i.e. there is no discernable reason that Plastic should precede wood.

Vertical – For those chapters in which goods are grouped by raw material there is, however, a vertical structure in which articles are often classified according to their degree of processing. For example, Chapter 44 contains items such as rough wood, wood roughly squared, and some wooden finished products such as wooden tableware.

Articles may also be classified according to the **use of function**. This classification (i.e. by function) mainly occurs in Section XII and Sections XVI – XXI. For example, Section XVII contains:

- Chapter 86 – Railway Locomotives, etc.
- Chapter 87 – Vehicles other than Railway, etc.
- Chapter 88 – Aircraft, etc.
- Chapter 89 – Ships, etc.

In order to illustrate the hierarchical structure of the H.S. the following example is given:

06 – Chapter
Live trees and other plants; bulbs, roots and the like; cut flowers and ornamental foliage;

06.01 – Heading
Bulbs, tubers, tuberous roots, corms, crowns and rhizomes, dormant, in growth or in flower; chicory plants and roots other than roots of heading no. 12.12;

0601.10 – Subheading
Bulbs, tubers, tuberous roots, corms, crowns and rhizomes, dormant;

0601.10.11 – Tariff item
Bulbs of the genus *narcissus*;

0601.10.11.10 – Statistical annotation
Daffodil.

6. **Statistical Period:** The reference period is the calendar month and the calendar year. The closing of the statistical month for imports is defined according to the last calendar day of the month, based as closely as practicable, on the date of clearance from Customs.

The closing of the statistical month for exports is also defined according to the last calendar day of the month. Those export documents which are received too late for incorporation in the current month are assigned to the month the transaction took place. If a monthly summary report from a high volume exporter is not received on time, the data are imputed for the current month, and revised with the trade value in the following statistical month.

Aux sections I à XV (sauf à la section XII), les groupes de produits formés selon la matière principale sont structurés ou subdivisés de deux façons:

Horizontalement – Pour les groupes de produits formés selon la matière principale, il ne semble y avoir aucun ordre hiérarchique (p. ex.: chapitre 39 – "Matières plastiques et ouvrages en ces matières; chapitre 44 – "Bois, charbon de bois et ouvrages en bois"). Et il n'y a aucune raison évidente justifiant le fait que les matières plastiques précèdent le bois.

Verticalement – Pour les chapitres où les produits sont groupés selon la matière brute, il y a, toutefois, une structure verticale suivant laquelle les articles sont souvent classifiés en fonction de leur niveau de transformation. Par exemple, le chapitre 44 comprend des produits comme le bois brut, le bois écorcé, et certains ouvrages en bois tels que les articles en bois pour la table.

Les articles peuvent aussi être classifiés selon leur **usage ou fonction**, comme c'est le cas surtout à la section XII et aux sections XVI à XXI. Par exemple, la section XVII contient :

- Chapitre 86 – Véhicules pour voies ferrées, etc.
- Chapitre 87 – Voitures automobiles, tracteurs, cycles et autres véhicules terrestres, etc.
- Chapitre 88 – Navigation aérienne, etc.
- Chapitre 89 – Navigation maritime, etc.

Afin d'illustrer la structure hiérarchique du SH, voici un exemple:

06 – Chapitre
Plante vivantes et produits de la floriculture;

06.01 – Position
Bulbes, oignons, tubercules, racines tubéreuses, griffes et rhizomes, en repos, végétatif, en végétation ou en fleurs; plants, plantes et racines de chicorée autres que les racines du n° 12.12;

0601.10 – Sous-position
Bulbes, oignons, tubercules, racines tubéreuses, griffes et rhizomes, en repos végétatif;

0601.10.11 – Numéro tarifaire
Bulbes du genre *narcisse*;

0601.10.11.10 – Annotation statistique
Jonquilles.

6. **Période statistique:** La période de référence est le mois et l'année civils. Pour les importations, la fin du mois statistique correspond au dernier jour du mois civil pour lequel il est possible d'obtenir des données sur le dédouanement.

Pour les exportations, la fin du mois statistique correspond aussi au dernier jour du mois civil. Les documents d'exportation qui parviennent trop tard pour que l'on puisse les intégrer au mois en cours sont affectés au mois où la transaction a eu lieu. Si le rapport sommaire mensuel d'un gros exportateur ne parvient pas à temps, ces données sont imputées au mois en cours, puis rajustées au cours du mois statistique suivant en fonction des valeurs observées.

Trade data for electricity, exports of both crude petroleum and natural gas, and imports of crude petroleum from the United States are collected too late for inclusion in current month statistics; therefore trade values for the current month are imputed on the basis of previous month's data and revised with the true value in the following statistical month.

7. **Country Classification:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and does not necessarily reflect the views or intentions of the Government of Canada on international issues of recognition, sovereignty or jurisdiction. The country classifications used and their associated codes resemble those developed by the International Organization for Standardization (ISO) and adopted by most of the trading countries, for Customs purposes.

A classification of countries with a statement of territorial limits used for statistical purposes is shown in the January and December issues of the publications "Exports by Commodity" (catalogue 65-004) and "Imports by Commodity" (catalogue 65-007), and in the annual publications "Exports, Merchandise Trade" (catalogue 65-202) and "Imports, Merchandise Trade" (catalogue 65-203).

8. **Trading Partner Attribution (country of origin/destination):** Exports are attributed to the country which is the last known destination of the goods at the time of export.

Imports are attributed to their country of origin, that is, the country in which the goods were grown, extracted or manufactured, in accordance with the rules of origin specified by Revenue Canada, Customs and Excise. Prior to 1988, most imports were attributed to the country of export/consignment with the exception of imports from Central and South America.

Import statistics according to U.S. state are not applicable to "Country of Origin" but are based solely on where the commodity clears U.S. Customs. This may not necessarily be the "State" where the commodity was grown, extracted or manufactured. Export statistics by U.S. state are based on the last known destination of the commodities at the time of export. The term N/A "not applicable" refers to commodities originating in the United States but shipped to Canada from a country other than the United States.

9. **Province of Origin/Clearance:** Prior to April 1984, export statistics were presented by province of lading, indicating the province in which the goods were last laden aboard a carrier for export. Since April 1984, for most commodities, trade data are presented by province of origin which represents the province in which the goods were grown, extracted or manufactured.

Import statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for

Les données sur le commerce de l'énergie électrique, sur les exportations de pétrole brut et de gaz naturel, sur les importations de pétrole brut des États-Unis sont recueillies trop tard pour être incluses dans les statistiques du mois courant. Par conséquent, les valeurs marchandes applicables au mois courant sont imputées au moyen des données du mois précédent, puis rajustées au cours du mois statistique suivant en fonction des valeurs observées.

7. **Classification des pays:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue à des fins de géographie économique et ne reflète pas nécessairement l'opinion du gouvernement du Canada sur les questions de reconnaissance, de souveraineté ou de compétence en matière internationale. La classification des pays utilisée et les codes connexes ressemblent à ceux qui ont été mis au point par l'Organisation internationale de standardization (OIS) et adoptés par la plupart des pays commerçants, à des fins douanières.

Une classification des pays ainsi qu'une description des limites territoriales servant à des fins statistiques paraissent dans les numéros de janvier et de décembre des publications "Exportations par marchandise" (n° 65-004 au catalogue) et "Importations par marchandise" (n° 65-007 au catalogue), ainsi que dans les publications annuelles "Exportations, Commerce de marchandises" (n° 65-202 au catalogue) et "Importations, Commerce de marchandises" (n° 65-203 au catalogue).

8. **Désignation des partenaires commerciaux (pays d'origine/pays de destination):** Les exportations sont attribuées au pays désigné comme la dernière destination connue des marchandises au moment de l'exportation.

Les importations sont attribuées au pays d'origine, c'est-à-dire au pays où les produits ont été cultivés, extraits ou fabriqués, conformément aux règlements des pays origines spécifiés par Revenu Canada, Douanes et Accise. Avant 1988, la plupart des importations étaient attribuées aux pays d'exportation/consignation à l'exception des importations en provenance d'Amérique centrale ou d'Amérique du Sud.

Les statistiques sur les importations provenant des États américains ne désignent pas le "pays d'origine", mais sont basées uniquement sur le lieu où une marchandise est dédouanée aux États-Unis. Il ne s'agit pas nécessairement de l'"État" où la marchandise a été cultivée, extraite ou fabriquée. Les statistiques sur les exportations destinées aux États américains sont basées sur la dernière destination connue des marchandises au moment de l'exportation. Le terme S/O (sans objet) désigne les marchandises qui proviennent des États-Unis mais qui sont expédiées au Canada à partir d'un pays autre que les États-Unis.

9. **Province d'origine/dédouanement:** Avant avril 1984, les statistiques sur les exportations étaient présentées selon la province de chargement; elles indiquaient la province où les marchandises étaient finalement confiées à un transporteur pour être exportées. Depuis avril 1984, pour la plupart des marchandises, les données commerciales sont présentées selon la province d'origine, c'est-à-dire celle où les produits ont été cultivés, extraits ou fabriqués.

Les statistiques sur les importations selon la province de dédouanement indiquent la province où les marchandises ont passé à la douane pour être ensuite consommées

entry into a bonded Customs warehouse. This may not always coincide with the province in which the goods are consumed.

10. **Mode of Transport:** This information, not always provided on the export documents, is sometimes imputed/estimated on the basis of other information such as the name of the exporting carrier. For exports, mode of transport information represents the mode of transport by which the international boundary is crossed. This may be different from the mode of transport within Canada.

For imports the mode of transport information represents the last mode of transport by which the cargo was transported to the port of clearance in Canada and is derived from the cargo control documents of customs. This may not be the mode of transport by which the cargo arrived at the Canadian port of entry in the case of inland clearance, and thus, this may lead to some underestimation of Canadian imports by the marine and air transport modes.

11. **Legal Framework:** International merchandise trade statistics are derived from information contained on administrative records collected by Revenue Canada, Customs & Excise, under the Customs Act. Copies of these documents (or information therefrom) are sent to Statistics Canada in accordance with Section 25 of the Statistics Act. It follows that the disclosure of trade statistics is governed by both the Customs Act and the Statistics Act and is subject to the provisions of Section 17.(2)(a) of the latter.

III Other Subjects

1. **Seasonal Adjustments:** Both export and import statistics show large monthly fluctuations. In order to isolate turning points or trends in the basic data, it is necessary to eliminate this effect of seasonal movement. Seasonally adjusted data are published on balance of payments basis in the "Preliminary Statement of Canadian International Trade" (catalogue 65-001P) and in the "Summary of Canadian International Trade" (catalogue 65-001).
2. **Abbreviations:** Names of countries, descriptions of units of measure and descriptors of the H.S. used in trade publications are often abbreviated or shortened for publication purposes. A key to these abbreviations appears in the publications "Exports by Commodity" (catalogue 65-004), "Imports by Commodity" (catalogue 65-007), "Exports by Country" (catalogue 65-003), "Imports by Country" (catalogue 65-006), "Exports, Merchandise Trade" (catalogue 65-202) and "Imports, Merchandise Trade" (catalogue 65-203).

In order to ascertain the exact content of a particular HS number, reference must be made to either the "Customs Tariff" (catalogue RV55-2/1988E available from the Canadian Government Publishing Centre) or the "Canadian Export Classification" (catalogue 12-578E Statistics Canada).

immédiatement, ou être mises dans un entrepôt de douane. La province de dédouanement ne correspond pas toujours à la province où sont consommés les produits en question.

10. **Mode de transport:** Les documents d'exportation ne donnent pas toujours de renseignements sur le mode de transport qui est parfois imputé ou estimé d'après d'autres renseignements tels que le nom du transporteur qui achemine les marchandises. Dans le cas des exportations, les renseignements sur le mode de transport correspondent au mode de transport utilisé pour franchir la frontière internationale. Il peut être différent de celui utilisé au Canada.

Dans le cas des importations, les renseignements sur le mode de transport correspondent au dernier mode de transport au moyen duquel le fret a été transporté jusqu'au bureau de dédouanement au Canada et sont tirées des documents douaniers de contrôle du fret. Il se peut que ce ne soit pas le mode de transport par lequel le fret est arrivé au bureau d'entrée canadien dans le cas des ports intérieurs, et cela peut entraîner par conséquent une certaine sous-estimation des importations canadiennes effectuées par les voies maritimes et aériennes.

11. **Cadre juridique:** Les statistiques canadiennes sur le commerce de marchandises sont tirées d'éléments qui figurent dans les dossiers administratifs de Revenu Canada, Douanes et Accise, et qui ont été obtenus en vertu de la Loi sur les douanes. Des copies de ces documents (ou des renseignements qu'ils contiennent) sont envoyées à Statistique Canada, conformément à l'article 25 de la Loi sur la statistique. En conséquence, la divulgation de statistiques commerciales est régie à la fois par la Loi sur les douanes et par la Loi sur la statistique. Elle est assujettie aux dispositions de l'article 17.(2)(a) de cette dernière.

III Autres questions

1. **Désaisonnalisation:** Les statistiques sur les importations et sur les exportations présentent d'importantes fluctuations mensuelles. Afin d'isoler les points de retournement ou les tendances dans les données de base, il est nécessaire d'éliminer cet effet de mouvement saisonnier. Les données désaisonnalisées établies en fonction de la balance des paiements sont publiées dans "Communiqué préliminaire sur le commerce international du Canada" (n° 65-001P au catalogue) et dans "Sommaire du commerce international du Canada" (n° 65-001 au catalogue).
2. **Abréviations:** Les noms des pays, les désignations des unités de mesure et les définitions du SH utilisés dans les publications sur le commerce sont souvent abrégés pour les besoins de la publication. Un tableau explicatif des abréviations figure dans les publications "Exportations par marchandise" (n° 65-004 au catalogue), "Importations par marchandise" (n° 65-007 au catalogue), "Exportations par pays" (n° 65-003 au catalogue), "Importations par pays" (n° 65-006 au catalogue), "Exportations, Commerce de marchandises" (n° 65-202 au catalogue) et "Importations, Commerce de marchandises" (n° 65-203 au catalogue).

Pour vérifier le contenu exact d'une position du SH, il faut se reporter soit au "Tarif des douanes" (no de catalogue RV55-2/1988F disponible au Centre d'édition du gouvernement du Canada) ou à la "Nomenclature canadienne des exportations" (no de catalogue 12-578F Statistique Canada).

3. **Quantities:** Units of measure are available from the "Canadian Export Classification" (catalogue 12-578E), the "Customs Tariff" (catalogue RV55-2/1988E) and from the publications "Exports by Commodity" (catalogue 65-004), "Imports by Commodity" (catalogue 65-007), "Exports, Merchandise Trade" (catalogue 65-202) and "Imports, Merchandise Trade" (catalogue 65-203). A definition of each unit of measure is provided at the beginning of these publications and "numbers" refer to complete (or substantially complete) units exported or imported, excluding parts. Measures of weight and volume generally exclude any packaging required for shipment. Units of measures used are those of the International Standardization Organization (ISO).
 4. **Values:** Trade statistics are generally presented in thousands of dollars. However, all totals and their components (e.g. countries) are calculated from full dollar figures and "truncated" independently in order to obtain the highest degree of accuracy for each cell. Consequently, the "truncated" totals may not equal the sum of their components.
 5. **Aggregation of Small Value Countries:** The concept of aggregating small value countries at the commodity/country level has been adopted for the monthly publications "Exports by Commodity" (catalogue 65-004 - Table 3) and "Imports by Commodity" (catalogue 65-007 - Table 3). All countries averaging less than \$25,000 (Exports) and \$25,000 (Imports) per month on a cumulative year-to-date basis are grouped together and shown as "Other Countries" at the end of the list of countries for each commodity. Therefore, the omission of a country name does not necessarily mean there is no trade for that country. Complete commodity/country data regardless of size is available on microfiche from the International Trade Division.
 6. **Revisions:**
 - a. **Data for current month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" (catalogue 65-001P) and in the "Summary of Canadian International Trade" (catalogue 65-001) contain preliminary figures. Revised figures are published in "Exports by Commodity" (catalogue 65-004), "Imports by Commodity" (catalogue 65-007), "Exports by Country" (catalogue 65-003) and "Imports by Country" (catalogue 65-006).
 - b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the December and annual reports have been published.
 - c. **Data for the previous year:** Figures for the previous year remain subject to revision until the December issue of the following year.
3. **Quantités:** Les unités de mesure sont indiquées dans la "Nomenclature canadienne des exportations" (n° 12-578F au catalogue), dans "Tarif des douanes" (n° RV55-2/1988F au catalogue) et dans les publications "Exportations par marchandise" (n° 65-004 au catalogue), "Importations par marchandise" (n° 65-007 au catalogue), "Exportations, Commerce de marchandises" (n° 65-202 au catalogue) et "Importations, Commerce de marchandises" (n° 65-203 au catalogue). Chaque unité est définie dans les premières pages de ces publications, et les nombres représentent des unités complètes (ou presque complètes) exportées ou importées, à l'exclusion des pièces. Les mesures de poids et de volume ne tiennent habituellement pas compte de l'emballage nécessaire à l'expédition. Les unités de mesure employées sont celles de l'Organisation internationale de normalisation (ISO).
 4. **Valeurs:** Les statistiques commerciales sont généralement présentées en milliers de dollars. Toutefois les totaux et leurs composantes (p. ex. les pays) sont calculés à partir de chiffres complets en dollars et "désagrégés" indépendamment dans le but d'obtenir, pour chaque cellule, la plus grande exactitude. Par conséquent, les totaux "désagrégés" peuvent ne pas être égaux à la somme de leurs composantes.
 5. **Agrégation des pays dont les échanges commerciaux sont de faible valeur:** L'agrégation, au niveau des marchandises/pays, des pays dont les échanges commerciaux sont de faible valeur, a été adoptée dans le cas des publications mensuelles "Exportations par marchandise" (n° de catalogue 65-004 - tableau 3) et "Importations par marchandise" (n° de catalogue 65-007 - tableau 3). Tous les pays qui d'une année à l'autre importent ou exportent en moyenne moins de \$25,000 (exportations) et \$25,000 (importations) par mois sont groupés et inscrits en tant que "Autres pays" à la fin de la liste des pays pour chaque marchandise. Par conséquent, le fait qu'un pays n'est pas mentionné ne signifie pas nécessairement qu'il n'y a aucun échange commercial avec ce pays. On peut se procurer auprès de la Division du commerce international des données complètes sur microfiche, selon les marchandises/pays, quelle que soit la taille des échanges commerciaux.
 6. **Rectifications:**
 - a. **Données du mois courant:** Les statistiques du mois courant publiées dans "Communiqué préliminaire sur le commerce international du Canada" (n° 65-001P au catalogue) et dans "Sommaire du commerce international du Canada" (n° 65 001 au catalogue) sont des données préliminaires. Des données révisées sont publiées dans "Exportations par marchandise" (n° 65-004 au catalogue), "Importations par marchandise" (n° 65-007 au catalogue), "Exportations par pays" (n° 65-003 au catalogue), et "Importations par pays" (n° 65-006 au catalogue).
 - b. **Données des mois précédents de l'année courante:** Les données des mois précédents de l'année courante sont sujettes à révision jusqu'à la parution du rapport mensuel de décembre et du rapport annuel.
 - c. **Données de l'année précédente:** Les données de l'année précédente sont sujettes à révision jusqu'à la parution du rapport de décembre de l'année suivante.

d. **Cumulative totals** in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** Price and volume indexes are published in the "Preliminary Statement of Canadian International Trade" (catalogue 65-001P) and in the "Summary of Canadian International Trade" (catalogue 65-001). Paasche price indexes which are current-weighted are calculated from price relatives based on 1981 = 100. The weights reflect trade values for the month, quarter or year to which the index refers and hence change from period to period. The Laspeyres volume index is derived by dividing a value index by the corresponding Paasche price index and is, therefore, weighted with fixed 1981 price weights.

The price indicators selected are either commodity unit values calculated directly from the trade statistics or insofar as end products are concerned price indexes obtained from other Canadian or foreign sources.

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis presented in Part I of the "Summary of Canadian International Trade" (catalogue 65-001) are also available on CANSIM in matrices 3633 to 3638. Comparable Customs based current and fixed weighted price indexes for the United States are available on CANSIM in matrices 3639 to 3642. In addition, these matrices contain the "All Country" group and United States indexes in terms of the 10 Sections of the "Standard International Trade Classification" (SITC).

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to the publication (catalogue 65-001).

8. **Sources of Further Information:** Monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and reference manuals of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published; for example, "Canada's Foreign Trade in Automotive Products" (quarterly), published in the "Statistics Canada Daily" (catalogue 11-001E) and the occasional publication titled "Canadian International Trading Patterns" (catalogue 65-503).

In addition, merchandise trade statistics are also available from the International Trade Division (in the form of computer printouts, magnetic tapes, diskettes and microfiche); from the CANSIM network (in matrices: 0021, 0022, 0876 to 0879, 3633 to 3644, 3649 to 3719, 3887 to 3913) as well as from the Statistics Canada Regional Offices.

d. **Les totaux cumulatifs** figurant dans toutes les publications tiennent compte des rectifications qui ont été apportées jusqu'à la date de l'impression.

7. **Indices des prix et de volume:** Les indices des prix et de volume sont publiés dans "Communiqué préliminaire sur le commerce international du Canada" (n° 65-001P au catalogue) et "Sommaire du commerce international du Canada" (n° 65-001 au catalogue). Les indices des prix Paasche, à pondération courante, sont calculés à l'aide de rapports de prix de base 1981 = 100. Les poids sont des valeurs marchandes pour le mois, le trimestre ou l'année auxquels se rapporte l'indice et, de ce fait, ils varient d'une période à une autre. L'indice de volume Laspeyres s'obtient en divisant un indice de valeur par l'indice des prix Paasche correspondant et il est pondéré par conséquent au moyen de prix fixes de 1981.

Les indices des prix choisis sont soit des valeurs unitaires de produits, calculées directement à partir des statistiques sur le commerce, ou, surtout en ce qui concerne les produits finals, des indices des prix obtenus d'autres sources canadiennes ou de sources étrangères.

Les indices des prix et de volume des exportations et des importations (à pondération fixe et courante) établis en fonction de la balance des paiements pour tous les pays et présentés dans la première partie du "Sommaire du commerce international du Canada" (n° 65-001 au catalogue) se trouvent également dans les matrices 3633 à 3638 de CANSIM. En outre, les matrices 3639 à 3642 contiennent des indices des prix à pondération fixe ou courante établis sur une base douanière pour les États-Unis. Elles contiennent de plus, des indices pour les groupes "tous les pays" et les "États-Unis" établis en fonction des 10 sections de la "Classification type pour le commerce international" (CTCI).

La méthode de construction des indices est expliquée dans le document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" et publié en décembre 1976 sous forme de supplément à la publication (n° 65-001 au catalogue).

8. **Sources de renseignements supplémentaires:** Les statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également obtenir une description détaillée des catégories de marchandises et connaître leurs classifications qui s'y rapportent. Veuillez consulter le catalogue des publications de Statistique Canada pour connaître le contenu des diverses publications. Grâce à une recherche soutenue en statistique du commerce, de nouveaux documents de référence paraissent de temps à autre; mentionnons, par exemple, "Commerce des produits de l'automobile avec les autres pays" (trimestriel), publié dans "Le quotidien de Statistique Canada" (n° 11-001F au catalogue), et la publication hors série intitulée "Profil du commerce international canadien" (n° 65-503 au catalogue).

On peut également se procurer des statistiques sur le commerce de marchandises auprès de la Division du commerce international (sous forme d'imprimés d'ordinateur, de bandes magnétiques, de disquettes ou de microfiches), du réseau CANSIM (matrices 0021, 0022, 0876 à 0879, 3633 à 3644, 3649 à 3719, 3887 à 3913) et des bureaux régionaux de Statistique Canada.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

Toute question portant sur un aspect des méthodes qui n'aurait pas été traité dans les pages précédentes doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa (Ontario) K1A 0T6.

Note: Country of Origin

Starting with January 1988, all import data on a CUSTOMS BASIS are attributed to their country of origin, rather than their country of consignment/export.

The impact of this change can be quite significant for some countries. Tables 3 and 4 show 1987 and 1988 import data for Canada's most important trading partners based on both the old concept and the new concept.

Note: Pays d'origine

À compter de janvier 1988, toutes les données sur les importations sur BASE DOUANIÈRE sont attribuées au pays d'origine plutôt qu'au pays de consignment/exportation.

Cette modification aura une répercussion importante dans le cas de certains pays. Les tableaux 3 et 4 montrent les données relatives aux importations de 1987 et de 1988 pour les plus importants partenaires commerciaux du Canada selon l'ancienne disposition et la nouvelle.
